Four Fish: The Future of the Last Wild Food: Paul ... Four fish, then. Or rather four archetypes of fish flesh, which humanity is trying to master in one way or another, either through the management of a wild system, through the domestication and farming of individual species, or through the outright substitution of one species for another. Four Fish Four Fish by Paul Greenberg Released in 2010, Four Fish is a non-fiction book by Paul Greenberg that explores the state of the commercial fishing industry and the problems that arise when demand outpaces supply. Four Fish - Wikipedia Four Fish: The Future of the Last Wild Food is a 2010 nonfiction book by author Paul Greenberg. This work explores the state of commercial fishing and aquaculture. Greenberg frames his observations by commenting on the status of four specific fish: cod, salmon, bass, and tuna.

Four Fish: The Future of the Last Wild Food by Paul Greenberg Four Fish provided a very good overview of the state of wild fisheries and fish farms through the eyes of someone who genuinely cares about fish and fishing. After reading Bottomfeeder, I was wary that it may cover a lot of similar terrain, but this actually provided an interesting and thought-provoking perspective about how people view fish. Four Fish: The Future of the Last Wild Food by Paul ... The four fish that are investigated are the Tuna, the Salmon, the Bass, and the Codâ€™the four fish that dominate the menus at fancy restaurants and fast food chains and family dinner tables. The underlying premise is that globally we are overfishing.
